**Re:** Fluid Inventory Control Product Line Changes

March 1<sup>st</sup>, 2022, Balcrank is discontinuing our Fusion Fluid Inventory control system and Tank Guardian monitoring system. We will no longer accept orders for new systems but will continue to support these products with replacement parts and modules. Last year we introduced the TM Control which is listed on page 123 of our current catalog. This unit monitors up to 4 tanks and can be used with an external alarm and strobe. Very soon Balcrank will launch a new Fluid Inventory Control system that will bring new opportunities for sales.

The part numbers being discontinued are listed below. If you should have any questions or concerns, please contact our customer service department at 800-747-5300
