

Fluids

- Grease up to NLGI-2

## Applications

- Lube trucks
- Railroad/mass transit
- In-plant long distance pumping
- Marine
- Oil fields/fracking

## Overview

Designed for very cold environments and/or applications where only medium pressure air is available to power the pump which could limit the performance and application of greasing. This pump can be used with a follower plate system, combined with a gravity inductor system, or a double post RAM for simultaneous dispense, or higher flow applications. Similar to the Lion ${ }^{\text {TM }} 45070: 1$ pump but operates at lower cycle rates for severe environments

(1) Air consumption at 5 bar air pressure, $\mathrm{NLGI}-0$ grease at $20^{\circ} \mathrm{C}$ and 80 cpm .
(2) Noise level measured at 1 m from the pump, 7 bar air pressure and free delivery (3) Pump air limited to 100 psi (7 bar) due to connecting hose pressure limits.

Warning! Do not use any Lion ${ }^{\text {me }} 450 / 600$ series products with flammable fluids.
Verify fluid compatibility with MSDS sheets.
