## Fluids

## \& Applications

Designed for very cold environments and/ or applications where only medium pressure air is available to power the pump which could limit the performance and application of greasing. This pump can be used with a follower plate system, combined with a gravity inductor system, or a double post RAM for simultaneous dispense or higher flow applications (see pg. 50 \& 51),

## Fluids

- Grease up to NLGI-2

## Applications

- Lube trucks
- Railroad/mass transit
- In-plant long distance pumping
- Marine
- Oil fields/fracking

| MODELS <br> AVAILABLE | DESCRIPTION |
| :---: | :---: |
| 1450-006 | Lion"' 450 70:1 grease 120 lb drum pump |
| 1450-005 | Lion" 450 70:1 grease 400 lb drum pump |
| 1450-007 | Lion" 450 70:1 grease bulk tote pump |

TEST FLUID: NLGI-2

(1) Air consumption at 5 bar air pressure, $\mathrm{NLGI}-0$ grease at $20^{\circ} \mathrm{C}$ and 80 cpm .
(2) Noise level measured at 1 m from the pump, 7 bar air pressure and free delivery.
(3) Pump air limited to 100 psi ( 7 bar ) due to connecting hose pressure limits.

Warning! Do not use any Lion ${ }^{\text {m" }} 450 / 600$ series products with flammable fluids.
Verify fluid compatibility with MSDS sheets.
Contact Balcrank for pumping grease higher than NLGI-2 and specific system design performance technical data.
