

Fluid Inventory Control

NEX-U® Compact

NEX-U® also offers solutions for smaller workshops where web-based software is not needed. NEX-U® Compact is a simple system based on a special U-dat keypad that is able to control a maximum of 8 dispensing points.

Features

The Keypad includes a 7" colored screen and a simplified version of the U-track software. The software included provides workshops with:

- Full control of bulk stored fluid usage.
- Inventory control using declining balance method. NEX-U® Compact will give a warning signal once a certain inventory is reached, and restricts access to those outlets that have run out of inventory.
- Ability to generate full reports in CSV format that can provide useful management information.

NEX-U® Compact 75.
With a 75 W transformer for opening up to 2 solenoid valves and dispensing 2 fluids

NEX-U® Compact 320.
With a 320 W transformer for opening up to 8 solenoid valves and dispensing 8 fluids

Power cord not included, use 3130-001.

NEX-U® Compact does not support working within a network or PC connection.
